February 20, 2019

Sen. Delores G. Kelley, Chair  
Senate Finance Committee  
3 East  
Miller Senate Office Building  
Annapolis, MD 21401

Madam Chair:

The National Association of Dental Plans (NADP) is providing these comments in opposition to SB 239, which imposes new taxes on insurers, including dental plans.

Last year the Assembly enacted a law that created a new, one-time 2.75% tax on premiums. SB 239 would expand that law by collecting that 2.75% tax in every year that the federal government does not collect the Health Insurance Providers Fee under § 9010 of the Affordable Care Act. In every year that the federal government does collect that fee, SB 239 would impose a new 1% tax. The proceeds from these taxes are intended to fund a reinsurance program at the state level.

While NADP understands the state’s desire to stabilize the individual health insurance market, please be aware that imposing the tax on dental plans is not appropriate for the reasons outlined below, and would create a domino effect of negative consequences, from higher premiums to declining health outcomes for Marylanders:

**Dental premiums are low**: Dental premiums are 1/12th of medical premiums even though dental plans and medical issuers perform the same basic administrative functions with similar structures (e.g. claim payment, customer service, network development, etc.) Dental carriers have fewer premium dollars to support similar administrative functions, which are critically important. They are also subject to taxes and fees similar to health plans. The taxes included in this bill would likely force dental carriers to raise their premiums, which would otherwise remain relatively unchanged.

**Dental premiums are stable**: Premiums in our industry do not vary greatly. The average annual change in premiums over the last five years has been in the range of +1.5% to -0.9%. Consumers are extremely price sensitive to the cost of their dental benefit premiums whether offered through their employer or purchased in the individual market. In surveys, cost is always
listed as their top consideration when deciding which dental insurance product to buy. Because dental is a voluntary benefit, an increase in premiums triggered by the taxes in this bill will result in fewer consumers having access to oral health coverage. This effect would be further compounded because consumers’ health insurance costs would also increase due to the tax on health insurance premiums.

**Premium hikes lead to declining oral health and overall health.** Surveys show that consumers with coverage are more than twice as likely to go the dentist as those without coverage. An increase in premiums will cause consumers to forgo purchasing dental coverage. Without dental benefits, dental visits would drop precipitously, and dentists will see fewer consumers for treatment. Given the strong link between oral and overall health, medical costs would rise further for adults with periodontal disease and chronic and high cost medical conditions such as diabetes, heart disease, susceptibility to stroke and pregnant women at risk for low birth weight babies. Because the bill also taxes health insurance premiums, the higher costs of medical, dental and other impacted coverages would compound these effects, and further impair consumers’ ability to afford voluntary dental benefits.

Given the low cost of dental benefits, the relatively flat premium increases, and consumer sensitivity to the price of dental products, the proposed taxes are disproportionate and unfair to dental consumers and carriers, who do not benefit from the state reinsurance program.

**For these reasons, NADP strongly urges the Committee to exempt dental plans from the taxes proposed by this bill.** Doing so would prevent premium increases for patients and maintain their access to dental care, which is critical to preserving their health.

NADP appreciates the opportunity to provide comments and is available to provide further information as requested – we maintain and collect a broad range of data on the dental benefits industry. In addition to these comments, we have also attached our Maryland Dental State Fact Sheet for your review. Please contact me with any questions regarding these comments at 972.458.6998x111 or eaugustini@nadp.org. Again, thank you for your consideration.

Sincerely,

Eme Augustini
Director of Government Relations
