#### National Association of Dental Plans®

#### Welcome to LOTS

As a member of NADP, you have access to the Legislative Online Tracking System, or LOTS, a comprehensive Web-based monitoring system - tracking critical and applicable legislation and regulation in all 50 states, the District of Columbia, and the federal government every day of the year from anywhere in the world.

NADP has worked with StateScape® to implement a tracking program tailored to dental plan needs. Legislation and regulation can be found under Legis Track and Regs Track tabs above and are placed under industry specific subjects with a myriad of search functions.

#### **GRW Legislative Update**

July 2018

Most states have adjourned their legislative sessions for the year and the Government Relations Workgroup (GRW) has prepared an update on key bills from 2018. The group met twice monthly during the first five months of the year to analyze over 140 bills, the most significant of which are mapped and described below. Stay tuned to the <u>Advocacy Open Forum</u> for updates on this and other topics.

# Annual State Wrap-up

. . . .

#### LOSS RATIO

Loss ratio standards require carriers to spend a certain portion of each premium on payment of claims, with the remaining portion being spent on other items such as marketing and administrative expenses. While medical loss ratios have been part of the Affordable Care Act for years, these standards have traditionally not been applied to dental plans.

CA SB 1008 (pending) – Originally would have imposed a loss ratio on dental carriers. NADP submitted <u>testimony</u> in opposition. After a heavy lobbying effort by the California Association of Dental Plans (CADP), the bill was eventually amended. It now only includes disclosure and reporting requirements on annual overall plan deductibles, annual benefit limits, coverage, and reimbursement levels.

IN HB 1049 (dead) — Would have required dental insurers to submit a medical loss ratio report to the DOI for each policy form through which coverage for dental services is provided. Would have required the DOI to make recommendations to the Legislature for setting a standard for medical loss ratios. NADP submitted testimony in opposition.

#### NETWORK LEASING

Only a handful of states have enacted legislation regulating the practice of provider network leasing. The most recent proposals were seen in New Jersey and Wisconsin.

NJ AB 605 / \$ 2507 (pending) — Would ban the practice of network leasing. Would prohibit a contracting entity from granting to a third-party access to: 1) a provider network contract; or 2) a provider's dental treatment services or contractual discounts pursuant to a provider network contract. NADP and multiple member companies submitted testimony in opposition and continue to advocate against these bills.

WISB 367 / AB 457 (dead) — Would have imposed requirements on dental plans that lease networks, including: notices in contracts with providers, setting up internet websites with leasing information for providers, and notifying providers in writing that their contract has been leased. Would have also allowed providers who do not wish their contracts to be leased to
